

Did you know.....

-

* Men's skin is generally oilier than that of the majority of women, which leads to acne issues. Hence, using face gels helps to prevent this and is highly recommended. Facial gels also help you avoid pigmentation and blemishes.

-

* Men's skin has a tougher tone and dark patches, as they shave regularly. Just using an after shave is not enough. Using a simple facial gel or organic face oil post shave is highly recommended.

-

* Men's skin needs hydration too. Skin dehydration is a major problem that leads to breakouts and dry patches. Hydration is key!

-

* In the past few years facial hair has morphed into the ultimate style accessory - and one that's not just an adjunct to your overall look but an expression of the inner you, too. Beard oil is a perfect compliment
